CONDUCTIVE BINS & ACCESSORIES

Conductive Stacking and Nesting Boxes

Ideal for storing and transporting electronic components, assemblies and loaded printed circuit boards. Reinforced thermoset polyester composite construction for maximum strength and durability. Does not require surface treatments. Meets ASTM D-257 surface resistivity requirements of static dissipative and conductive materials. Black. All dimensions are outside.

STACK AND NEST BOX

STACKING BOX

NESTING BOXES/STACK ON LIDS

Conductive Stacking Bins

Helps protect electronic components from static electricity. Wide stacking ledge ensures stability. Anti-slide stop helps prevent stacked bins from shifting. Molded-in hand grips for easy transport. Slotted label holders for easy identification. Black. Sold in carton quantities. Dividers sold in packages of 4.

Aluminum Shelf Clip

Use for high temperatures, heavy duty mobile trucks or conductive requirements.

Model No. AMA

Grounding Cable

Attaches to bottom shelf of mobile carts. Must be used in conjunction with aluminum shelf clips.

Model No. AGC
